

Features

- · Constant Voltage PWM style output with frequency 1.47kHz
- Plastic housing with class II design
- · Built-in active PFC function
- · Class 2 power unit
- No load power consumption < 0.5W
- Fully encapsulated with IP67 level
- Function: 3 in 1 dimming(dim-to-off); DALI
- · Minimum dimming level 0.2% for DA type
- Typical lifetime>50000 hours and 5 years warranty

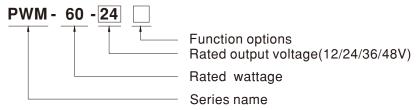

Applications

- · LED strip lighting
- · Indoor LED lighting
- LED decorative lighting
- · LED architecture lighting
- Type "HL" for use in Class I, Division 2 hazardous (Classified) location.

Description

PWM-60 series is a 60W LED AC/DC LED driver featuring the constant voltage mode with PWM style output, which is able to maintain the brightness homogeneity when driving all kinds of LED strips. PWM-60 operates from 90~305VAC and offers models with different rated voltage ranging between 12V and 48V. Thanks to the high efficiency up to 90%, with the fanless design, the entire series is able to operate for -40 $^\circ$ C $^\sim$ +85 $^\circ$ C case temperature under free air convection. The entire series is rated with IP67 ingress protection level and is suitable to work for dry, damp or wet locations. PWM-60 is equipped with dimming function that varies the duty cycle of the output, providing great flexibility for LED strips applications.

Model Encoding

Type	IP Level	Function	Note
Blank	IP67	3 in 1 dimming function (0~10Vdc, 10V PWM signal and resistance)	In stock
DA	IP67	DALI control technology.(for 12V/24V with DA type only)	In stock

This series meets the typical life expectancy of >50,000 hours of operation when Tcase, pa 6. Please refer to the warranty statement on MEAN WELL's website at http://www.meanwell.c 7. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fanless.	1. All parameters NOT specially mentioned are measured at 230VAC input, rated current and 25℃ of ambient temperature. 2. De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details. 3. Length of set up time is measured at first cold start. Turning ON/OFF the driver may lead to increase of the set up time. 4. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again. 5. This series meets the typical life expectancy of >50,000 hours of operation when Tcase, particularly to point (or TMP, per DLC), is about 75℃ or less. 6. Please refer to the warranty statement on MEAN WELL's website at http://www.meanwell.com 7. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft). 8. For any application note and IP water proof function installation caution, please refer our user manual before using. https://www.meanwell.com/Upload/PDF/LED_EN.pdf				

AC/L(Brown) AC/N(Blue) SJTW 18AWG×2C UL2464 18AWG×2C(Vo+,Vo-) UL2464 22AWG×2C(DIM+,DIM-) * Dimming principle for PWM style output * Dimming principle for PWM style output

• Dimming is achieved by varying the duty cycle of the output current.

DA+ for DA-type

* *DIM- for Blank-Type
DA- for DA-type
NOTE: DA Type is no distinction
between "+" and "-" poles

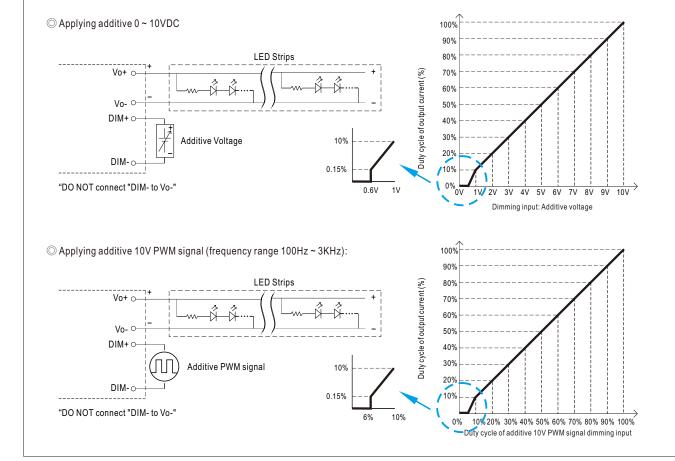

Duty cycle(%) =
$$\frac{TON}{T} \times 100\%$$

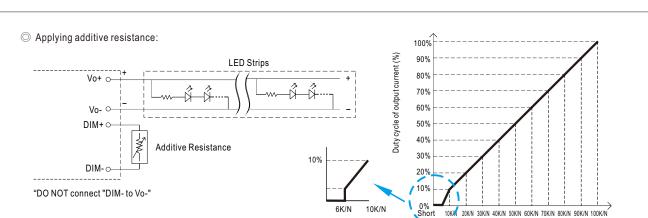

Output PWM frequency: 1.47kHz fixed (Typ.)

% 3 in 1 dimming function (for Blank-Type)

- · Apply one of the three methodologies between DIM+ and DIM-: 0 ~ 10VDC, or 10V PWM signal or resistance.
- Dimming source current from power supply: $100\mu A$ (typ.)

(N=driver quantity for synchronized dimming operation)
Dimming input: Additive resistance

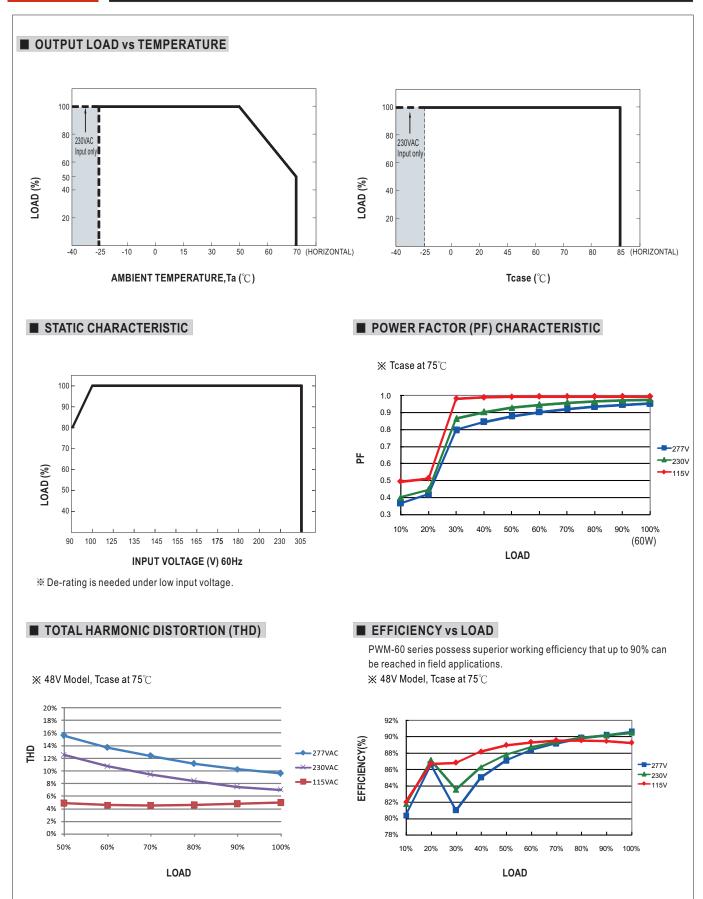

Note: 1. Min. duty cycle of output current is about 6% and the output current is not defined when 0% < Iout < 6%.

2. The duty cycle of output current could drop down to 0% when dimming input is about 0kΩ or 0Vdc, or 10V PWM signal with 0% duty cycle.

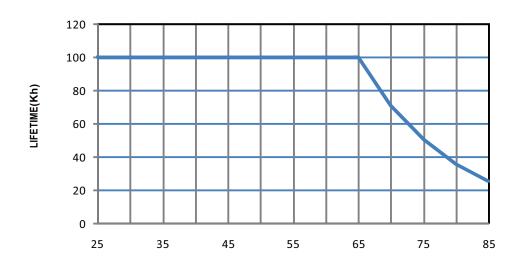

X DALI Interface (primary side; for DA-Type)

- · Apply DALI signal between DA+ and DA-.
- DALI protocol comprises 16 groups and 64 addresses.
- First step is fixed at 0.2% of output

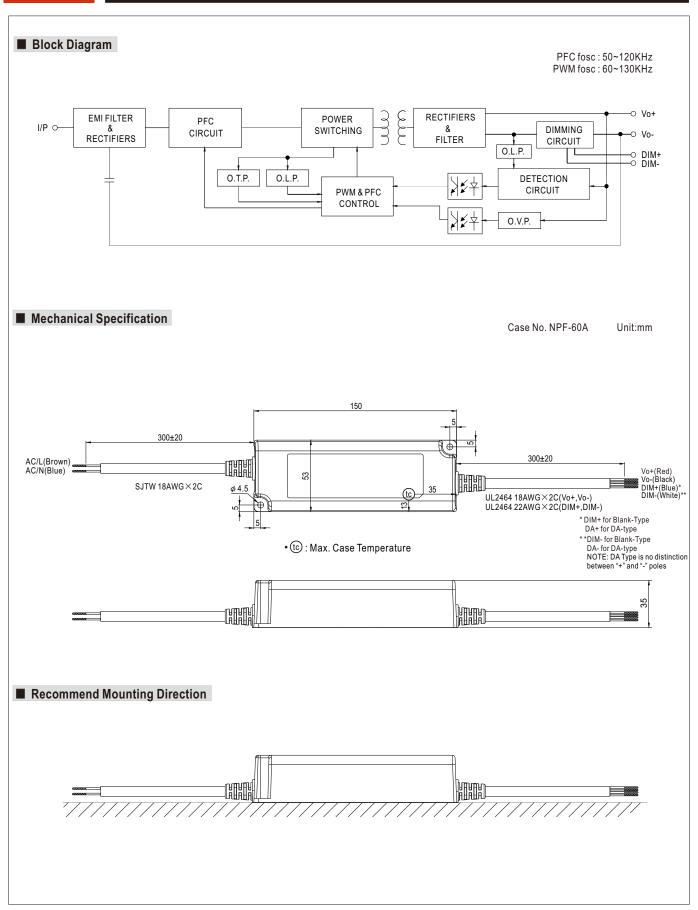

■ LIFE TIME

○Cautions

- Before commencing any installation or maintenance work, please disconnect the power supply from the utility. Ensure that it cannot be re-connected inadvertently!
- Keep proper ventilation around the unit and do not stack any object on it. Also a 10-15 cm clearance must be kept when the adjacent device is a heat source.
- Mounting orientations other than standard orientation or operate under high ambient temperature may increase the internal component temperature and will require a de-rating in output current.
- Current rating of an approved primary /secondary cable should be greater than or equal to that of the unit. Please refer to its specification.
- For LED drivers with waterproof connectors, verify that the linkage between the unit and the lighting fixture is tight so that water cannot intrude into the system.
- For dimmable LED drivers, make sure that your dimming controller is capable of driving these units.PWM series require 0.15mA each unit.
- Tc max. is identified on the product label. Please make sure that temperature of Tc point will not exceed limit.
- DO NOT connect "DIM- to Vo-".
- Suitable for indoor use or outdoor use without direct sunlight exposure. Please avoid immerse in the water over 30 minutes.
- The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
- For more information about installation, Please refer to : http://www.meanwell.com/manual.html for details.
